Internet Mathematics Contests

COLUMBUS STATE UNIVERSITY

**Stretch your brain in places it's
never been stretched before!**

- **The Elementary Brain Teaser**
(Elementary school students and under)
- **Middle School Madness**
(Middle school students and under)
- **Algebra in Action**
(Grades 6 and higher)
- **The Problem of the Week Contest**
(Open to all ages)

After viewing a contest problem, answers are submitted online. A return message is sent to each individual indicating whether the solution was correct or incorrect. If the answer was correct, the student's name and school address is listed on the contest site. At the end of the week, the current problem is retired to a page labeled "Past Problems." Teachers, students, and parents can still access and use these problems for mathematical enrichment and fun! These contests are viewed by thousands of students from around the world each week. Participants come from more than 5,000 cities in 85 different countries as well as all 50 U.S. states.
